Entry Conditions Formula

☒

These are the entry conditions for the schedule-triggered flow

Choose Object and Filter Conditions

To have the scheduled flow run for a batch of records, specify the object and the conditions that each record must meet. A flow interview runs for each record in the batch. You can access and update the record's field values in the \$Record global variable.

Object

Animal

Condition Requirements

All Conditions Are Met (AND)

Field	Operator	Value	
Entry_Conditions_Formula__c	Equals	 True 	

+ Add Condition
